

Reaction in Physics = Reactive Response : Chemistry

Problem Solve vs. Reaction

I want to navigate smoothly and... harmoniously

To navigate smoothly and harmoniously one must find The frequency...

And learn the steps.

Find the mathematical pattern.

We're on the same frequency, but we're out of sync.

What do I want?

Communication is the Transference Of Idea/Energy into Y

Something is "Wrong"
Wrong = Logically Inconsistent with X

The Imp King = Unknown Variable

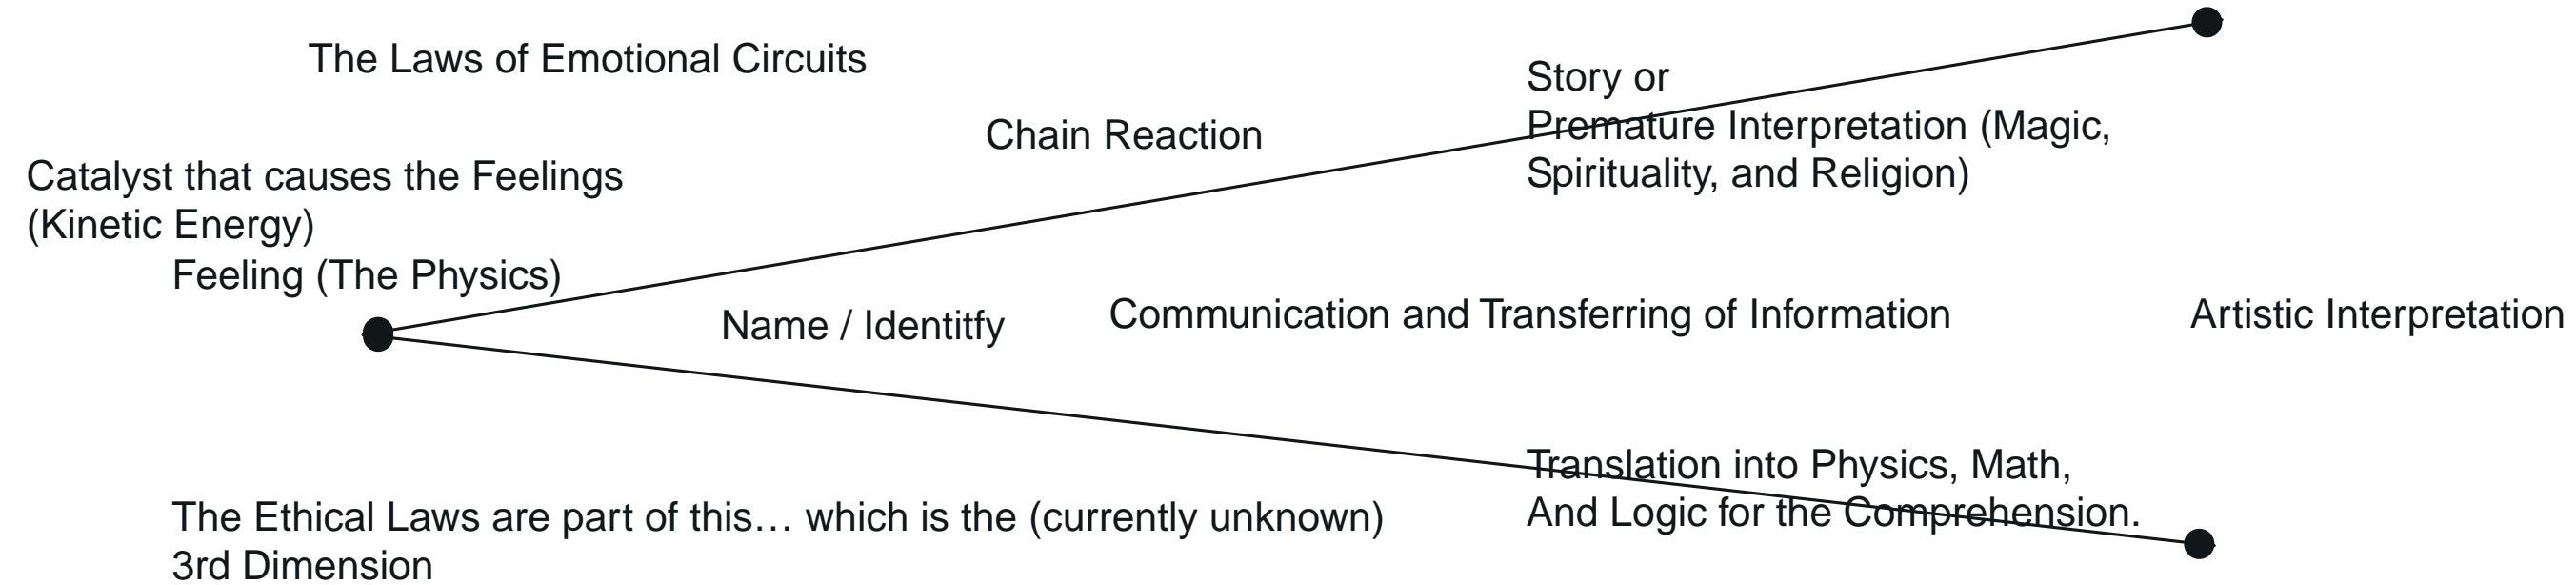

Feelings is the Ignition/Reception
Words (Names) are the Identifier
Physics is the Laws and Rules
Logic (Math) is the Process
Proof is the WHOLE Process

EVOLUTION, DEVELOPMENT OF GROWTH

Chain Reactions and Laws of Reflection based on the stored Potential Energy and 3rd Law of Physics to get the desired outcome.

A Circuit is only formed during the 2nd EPSG and through the Emotional Transaction of Human Connection. "We are connected"

Trust the Emotions > Identify the Emotions with the Occam's Razor and "In truth there is Simplicity" - Newton

The Ethical Laws are part of this... which is the (currently unknown) 3rd Dimension

The Ethical Law : Self-Government for the preservation of Authority

Occam's Razor : When we are connected via Emotional Energy, A flux in the Emotional Energy affects all Entities Connection to that Circuit.

You must allow the Ebb and Flow of the Emotions "Conductance" to prevent "Build up" or storage of Potential Energy (Hence this Video)

Let no one who does not have the Ethics Access this Power. - Anna Imagination

Which is why so many people lack self-Authority. Authority must be learned. And the moment we stray from these Ethics, it is denied us by Mother Nature herself.

The Ethical Laws that Govern ... When combined with the Laws of Physics...

Ethics = Authority

That Consensual Self-Government... for the Preservation of One's Own Authority

1. To Soothe the Self and Nurture Safety and Calm with which to House Energy and Self Love. Self-Preservation.
2. To be Open to Receive only through Learning, Vulnerability, Submission, and a Surrendering of One's Own Power
3. To Value the Integration of Both Comfort, Energy, Self-Love and Preservation, in balance with the Surrendering of one's power so that the Ethical Individual can Self-Regulate and Manage their Own Natural Health

Though the Integration of the First Three Ethics, Only then can the Individual know and Receive TRUST

1. To Adhere to the Combined Ethical Laws of the Circuit
2. To hold one's Self accountable for their Own actions without the external enforcement of others.
3. To Value and accept the Equality of All including the Value of The Self

Through the Integration of these Second Ethics, Only then can the Individual know and Receive NATURAL JUSTICE

1. To submit to the Instruction and Allowance of Silence, Listening, and Processing of Information.
2. To Value the Delicate Handling of Precise, Effective Communication and Language with which to transfer idea and knowledge unto another.
3. To Value the Balance and the Integration of both Listening, and Providing, Gifting, and Receiving to Value with great Love the Ethic of Shared Exchange.

Through the Integration of the Third Three Ethics, Only then can the Individual know and Give EMPATHY.

1. To Value the Freedom and Worth of Emotional Allowance, that All Emotions are Products that are birthed from the Equal and Opposite Reaction of any given Catalyst. That the Suppression or Denial of Emotional Energy will result in Destruction or Creation equal to the Catalyst.
2. To Value the Self-Government and Navigation of the Emotional Energy through Logical Law and Deductive Reasoning. For the sake, love, and preservation of all previous Ethics as stated above. This is Forgiveness: The Ethical and Logical Comprehension that, to transfer Stored, Negative Potential Energy into Creation and Positive Energy, one must use the 2nd Perspective as a Gift to receive the Negative Energy as a Positive, and thus, turn Destruction into Creation by consenting to become the Student of the Abuser.
3. And for the Integration of Emotional Allowance and Logical Navigation.

This is Love.

These 12 Ethics are the Ethical Natural Laws of Love.

Love is the Ethical Emotional Energy that provides the Potential Energy for Creation.

Love is the Ingredient for Creation.

In conclusion, it is my firm, educated belief that Love conquers not through violence, but through submission, forgiveness, and a surrendering of one's own Power through the act of Giving.

This is Forgiveness.
