

Logical Fallacy ... Mathematics = Numbers

Numbers are Math

The Science of Problems

Story Formula

Desire (Dream) + Obstacle = How the Obstacle is overcome =  
Story

Life is a story  
We REQUIRE Problem Solving  
Story = Dream + Obstacle

Mathematics is the Ability and skill of  
Overcoming your Obstacles so you can  
Have your dreams.

Physics is the Laws of Life  
Math is the Calculations required for Problem Solving

Mathematics and Physicists = Human Behavior  
Common Perspective = Learn Math and physics  
Human Behaviorist, who DON'T know Math or Physics  
must UNLEARN Human Behavior and Learn math and  
physics

Mathematics is the Science and Art of problem Solving

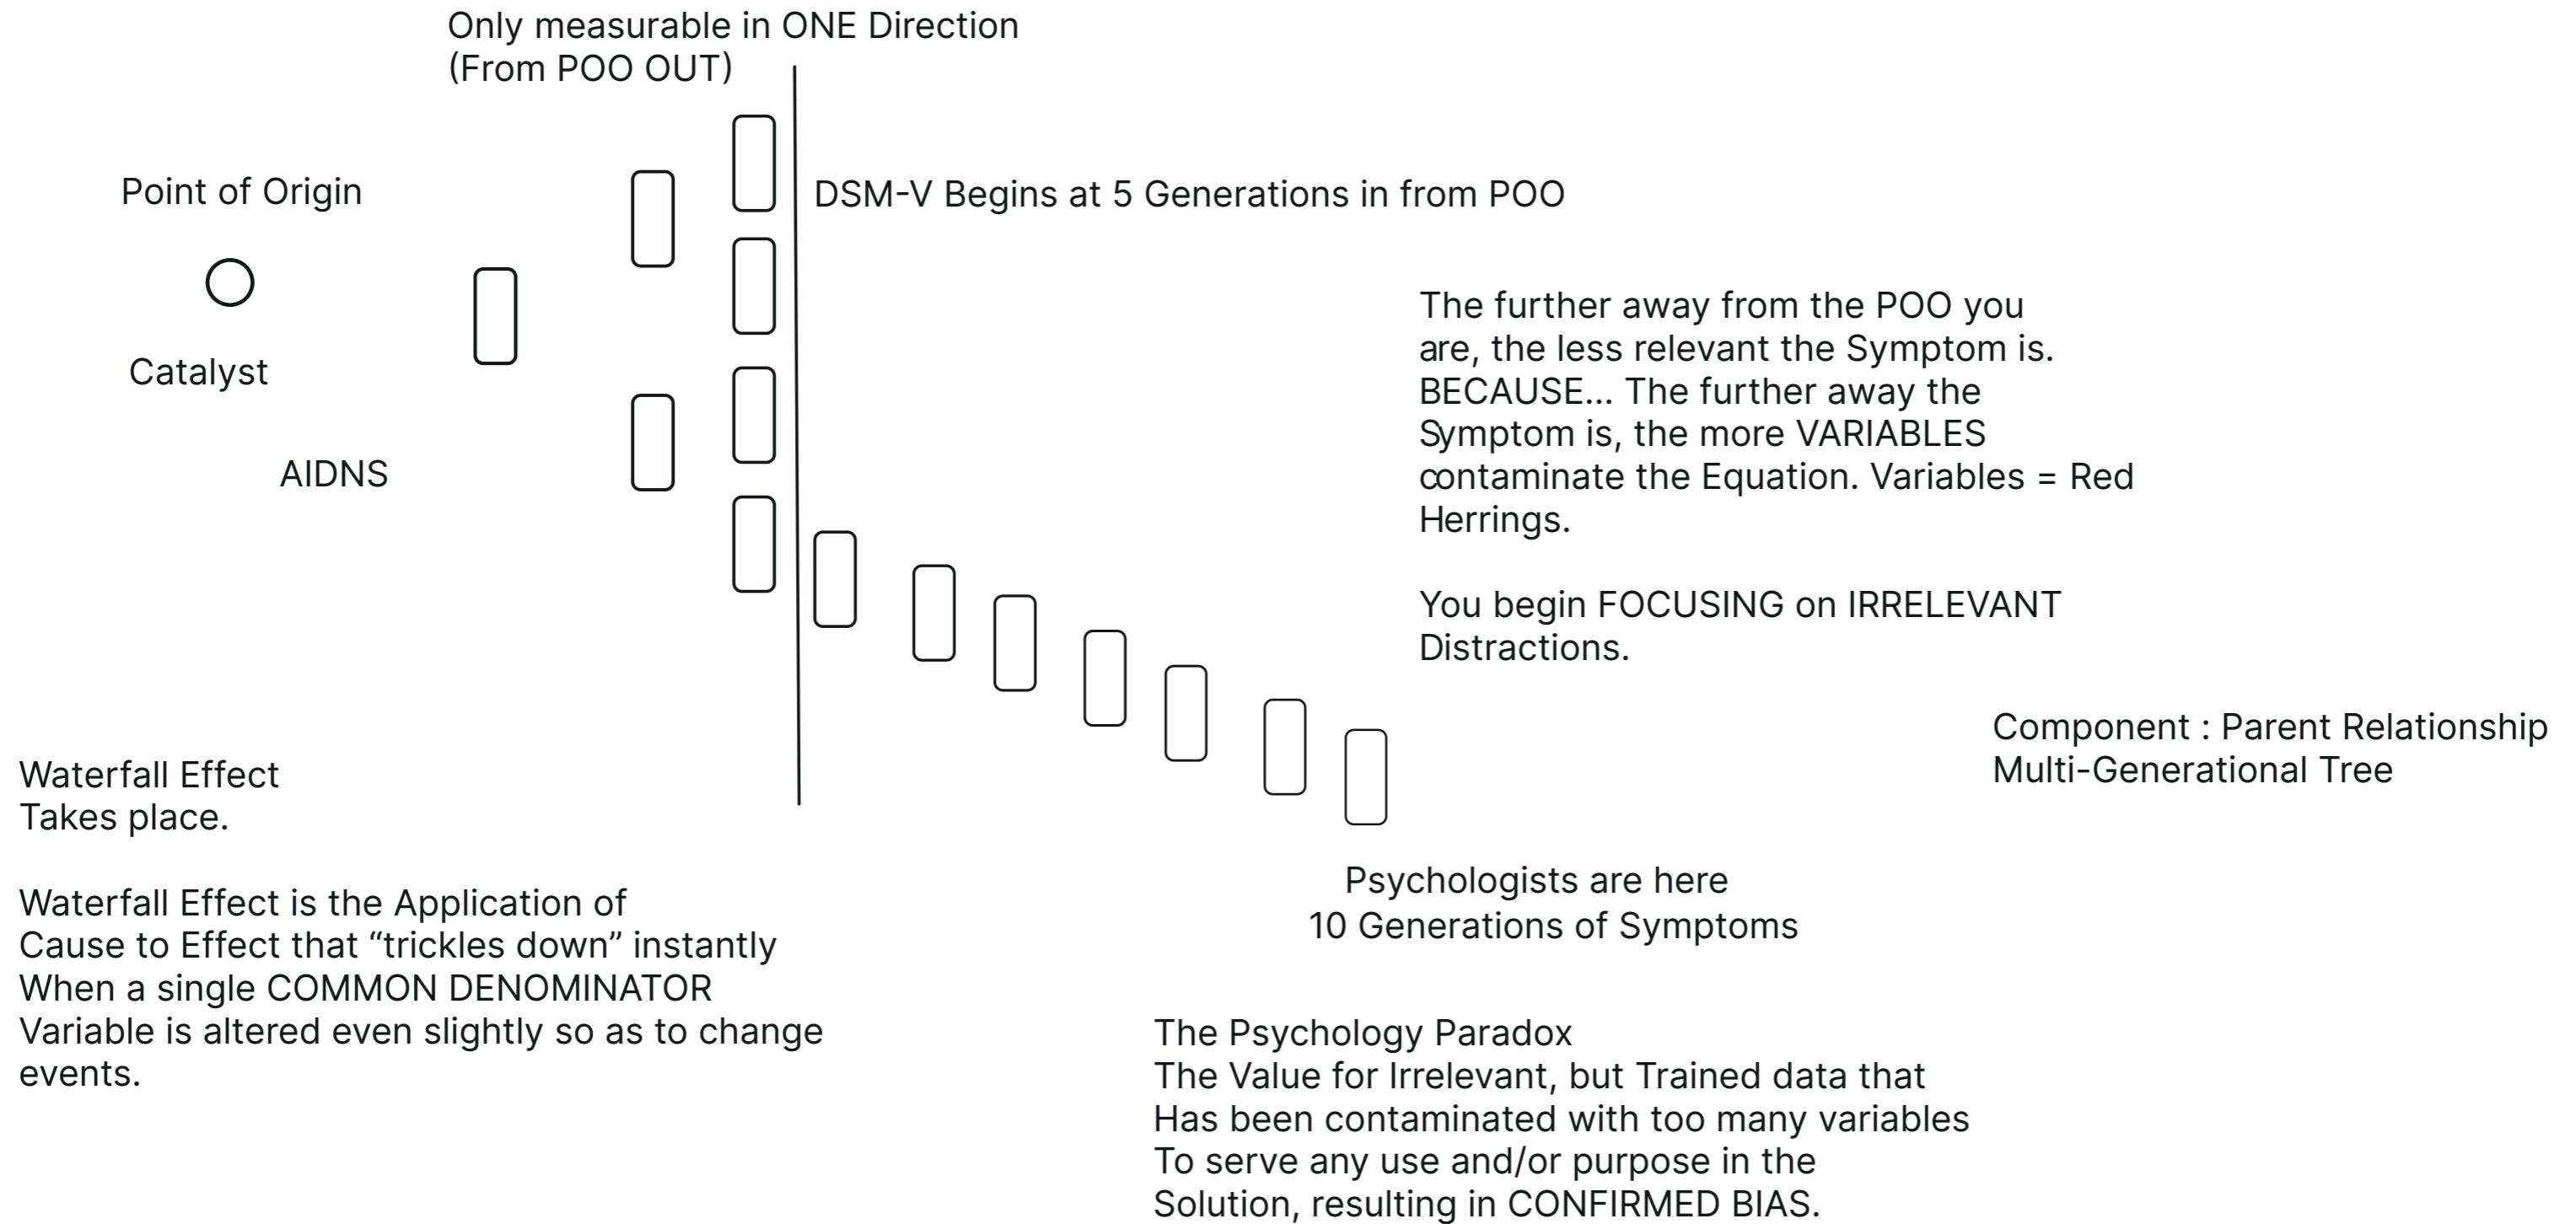

The Tools of Math  
Logic Deduction  
Words and Language  
Numbers are used as Defined Values

Intuition : Intuitive Logic  
Mathematical Intuition  
Instinct

Expansive Thinking

Components and Order of Operations that make up the Story

1. Defined (and Undefined) Variables
2. Build a Logical Proof (Premise and the Conclusion)
3. Determine the Problem and Diagnose it
4. Identity and Name of each Variable
5. Solutions
6. What variables weigh into the solution (Determining Relevance)
7. The Ability to examine and Assess the Situation from Multiple POV
8. Pattern Recognition
9. Components to Pattern Recognition
10. Recognizing Symptom (Effect) from Catalyst (Cause) (Distracted with Red Herrings)
11. Knowing how to Use your Mind properly and effectively
12. The Ability to Integrate and Divide
13. Organize and Categorize Data

## Intuition

The Natural Law and Order that is Logic, Math, and Physics

The Barometer and our Own Logical and Mathematical Comprehension that is so finally tuned to The Nature, that we

“Just Know Math” without study.

1. Mathematician and Physicist (Scientist) = TRAINED their POLISHED Intuition
2. Common Perspective (Uneducated) = UNTRAINED, BUT IT IS NATURAL INTUITION
3. Psychologist = Intuition has been tampered with = Tampered Intuition due to the Psychology Paradox (The IRONY that the “professionals” trained in their field are least qualified in their field).

The Happiness Formula  
The Life or "Truth" Formula

Want + Choice = Happy Life

(Wants + Dreams + Ethics = Identity) + (Logical Health + Premised Beliefs) = Integrated Perspective  
(Reality)

(Identity + 1:12:Infinity = POO) + (Logic:Fear) = X-Axis = Interference : Resistance + (POO + X-Axis = Y-Axis = Perceived  
Integrated Reality)

(Identity + 1:12:Infinity = POO)  
Past

(Logic:Fear) = X-Axis = Interference : Resistance  
Present

(POO + X-Axis = Y-Axis = Perceived Integrated Reality)  
Future

Past + Present + Future = Your Story

Past = Point of Origin  
Present = Point of Materialization  
Future = Point of Conception

Time's Order of Operations

1. Future
2. Present
3. Past

Example :  
To say that the Past happens First is like saying that  
A person is Born BEFORE they are Conceived.

TO APPLY ... FOR APPLICATION

Fear Nevermore

1. Do
2. Learn to DO

Want + Dream + Desire + DO = BECOME

Love

Choice

Interference

Resistance > Interference

Fear = How and Direction

Motivation

Procrastination

YOU DON'T WANT TO DO IT

Want = Excitement, Joy, Love, and MOTIVATION

List Your Fears

USING your Fears as the HOW  
and the DIRECTION of your Choices.

"What If..."

"What About..."

"I Can't..."

"I don't know how..."

"What If..." = You Lack IF/Then Statement IS A PLAN

"What About..." = Variation of an IF THEN STATEMENT (YOU NEED A PLAN)

"I Can't..." = You need to LEARN so you CAN

"I don't know how..." = YOU NEED TO LEARN SO YOU CAN

## Scientist

Indirect Path  
Math  
Physics  
Logic

Figure out that  $A = B$

Theory and Logical Comprehension Based

"I don't need the Bag and Colors  
MY LOVE FOR MATH IS ALL I NEED"

MATH LOGIC AND PHYSICS

What people THINK it is  
SCIENCE VS. IMAGINATION ART CREATIVITY

## Non-Scientist

Direct Path

Practical Application of Math,  
Logic, Physics (Without the  
Numbers)

Intuition Based

Colorful Fun Bag...

Simple and Practical Use  
With GAMES that is FUN

Anna's Playground

Working Class  
How to guide on GETTING HAPPY

What it REALLY is  
IMAGINATION ART CREATIVITY IS THE FOUNDATION  
OF SCIENCE

## How to Problem Solve your Life Obstacles so you can get YOUR DREAMS USING just your INTUITION

1. Defined (and Undefined) Variables
2. Build a Logical Proof (Premise and the Conclusion)
3. Determine the Problem and Diagnose it
4. Identity and Name of each Variable
5. Solutions
6. What variables weigh into the solution (Determining Relevance)
7. The Ability to examine and Assess the Situation from Multiple POV
8. Pattern Recognition
9. Components to Parent Recognition
10. Recognizing Symptom (Effect) from Catalyst (Cause) (Distracted with Red Herrings)
11. Knowing how to Use your Mind properly and effectively
12. The Ability to Integrate and Divide
13. Organize and Categorize Data

Expansive Thinking is a CONSEQUENCE of studying Mathematics, BUT... If certain variables are missing, "it won't work." And that is when you have an "educated idiot."

Expansive Thinking is TRAINED through Mathematics and Logic

Expansive Thinking = IQ Test  
Measures a person's Ability to use Expansive Thinking

FALSE PREMISE :  
"A person's IQ is determined at birth."

An IQ can be trained with Expansive Thinking.

Becoming Zarathustra Breaks down and introduces down  
The Order of Operations and the Variables required with the  
"HOW TO" increase your IQ as NATURE intended. It OPENS your  
mind and ACCESSES "Higher Thinking"
